

CANADIAN AIRPORTS COUNCIL CONSEIL DES AÉROPORTS DU CANADA

Vancouver, BC (4/20/2004) — Akuter Technologies Inc. (**Akuter**), developer of a unique Enterprise Content Management System for regulation and certification driven industries and **infoSkills Learning Inc.** announced today that **Canadian Airports Council (C.A.C.)** has selected **Akuter Enterprise** as a recommended solution to address their Airside Vehicle Operator's Permit (AVOP).

About the AVOP program

The AVOP program training objective is to offer Airport vehicle operators the opportunity to become and stay familiar with the airports' specific traffic directives, regulations, rules and procedures related to safe vehicle operations while operating a vehicle on the airside of an airport. This training is designed to help prevent accidents and eliminate or minimize the risk of injury to all persons within the airside area and meant to be a pre-requisite to issuance of an AVOP.

The Akuter rapid development and deployment feature will provide beneficiary airports an efficient way to implement their AVOP training by quickly developing, updating and publishing their learning and compliance materials to their vehicle operators.

About C.A.C.

The Canadian Airports Council represents 43 member airports, which between them operate over 100 airports of all sizes across the country and provide services to over 96% of all passengers.
